ECONOMY - Which statement do you agree with most?

Our government's most important economic priority should be to use taxes and stimulus money to increase the number of jobs.	1278
Our government should both regulate and protect American businesses; we should not have to compete with countries with low wages and few regulations, and we should not have to rescue failed banks.	1673
Our government's most important economic priority should be cutting taxes and the budget deficit.	1175
The U.S. is part of a global economy; we cannot compete worldwide if we don't have free trade agreements and freedom for investors.	586
Our government should leave economic policy to market forces and not intervene.	459

ENERGY - Which statement do you agree with most?

Our government should ration energy supplies and penalize inefficient users.	484
If we want a livable planet the government must demand energy conservation and decrease use of fossil fuels using prices and taxes to control use.	1510
We will not be able to develop other sources of energy fast enough. The government should focus on teaching energy conservation but let consumers use fossil fuels such as oil or coal as needed now.	1641
In the current U.S. recession, cheap and abundant energy to promote economic growth is more important than environmental protection.	842
We should let the market decide.	609

HEALTH CARE - Which statement do you agree with most?

Health care should be provided by our government as a basic human right, part of the pursuit of happiness and the Constitutional goal to promote the general welfare.	2197
The U.S. Government should provide a single-payer system like other countries, to cut out interference and extra costs from third parties like insurance companies, and should regulate the cost of drugs.	756
The U.S. Government should provide health care only to the neediest, and only for serious problems.	691

The Government cannot be trusted with our health care; it will just create bureaucratic inefficiency that will be worse than the current problems. Existing government health care programs like Medicare are subject to fraud.	633
---	-----

The Government should not get involved with the health care of private citizens. It should be their own responsibility.	839
---	-----

IMMIGRATION - Which statement do you agree with most?

The U.S. border is too complex to protect. It is not physically or economically possible to deport 11 million illegal immigrants. The government should focus instead on forcing illegal immigrants to pay high taxes and help the economy.	819
---	-----

We should provide a way for illegal immigrants to earn their citizenship, pay a large fine and help the economy.	1264
--	------

Providing a way for illegal immigrants to become legal will just encourage more illegal immigrants and more lawbreaking. If people are breaking the law, they should be punished.	969
---	-----

If we do not defend our borders criminals, terrorists, and drug dealers will inundate America.	1316
--	------

We should defend our borders no matter what it costs us, even if it means American citizens may lose their jobs as a result of the expense.	297
---	-----

The U.S. Constitution should be changed so that a child born in America cannot be an American citizen unless both of its parents are American citizens.	412
